

*"Building and maintaining a strong cyber workforce cannot be achieved unless a cybersecurity career is within reach for any capable American who wishes to pursue it and every organization with an unfilled position plays a part in training the next generation of cybersecurity talent."*  
—PRESIDENT BIDEN (NCS 4.6)

Reception to follow

To keep all Americans secure and boost the next generation of innovation in the U.S., it is a national security imperative that we drastically scale up the cyber workforce across the country. **This expert panel event will delve into the crucial topic of cyber workforce diversity, job-training and education, and the pivotal role academia, private industry, the nonprofit sector and the government play in building tomorrow's cyber workforce to confront the cyber threats of the future.** This is a must-attend session for anyone who wants to join the cybersecurity workforce or help diversify it.

Event sponsored by:  
Adobe Inc. and Bowie State University's Department of Computer Science
