BSU ImmuNet Information Sheet

Per Maryland State Statute [§18–109\(d\)\(6\)\(I\)3](#), “all vaccinations administered in the State of Maryland are required to be reported to ImmuNet, Maryland’s Immunization Information System (IIS), regardless of patient opt-out status in ImmuNet”.

ImmuNet is a secure and confidential web-based registry managed by the Maryland Department of Health (MDH). It is HIPAA and FERPA compliant. Your information will not be released to third parties without written consent. If you do not wish to disclose your immunization information with the ImmuNet authorized users, please submit your [opt-out form](#) to Maryland.gov.

Henry Wise Wellness Center’s electronic medical record system is set up to automatically retrieve and report your vaccine record with ImmuNet. This process is secure, cost effective, and in compliance with Maryland State Statute [§18–109\(d\)\(6\)\(I\)3](#).
